BUSINESS AREAS

TICKETING AND ACCESS CONTROL

The most advanced ticketing and access control technology on the market is fully developed in-house. Our solution handles ticketing, access control, assigned seating, events management, cashless wallet, chart of account, contactless experience through face recognition.

VENUE MANAGEMENT

Our system handles the full customer experience, from the registration to the post-event survey: food and beverage, retail, resource management, parking, positioning systems, queue management, event management. All in one system.

B2C SALES

Web sales, retail ticket distribution and marketing campaigns, leveraging our network of box offices, stores, web portals and OTA integrations

STRUCTURE

TRACK

RECORDS

Best Union Company S.p.A. was created from the merger of a company specializing in event management and ticketing with a software house. It is September 23rd.

1999

Pavarotti International, owned by Maestro Luciano Pavarotti, acquires 20% of the shares; Giorgio Seragnoli's King S.p.A. acquires 15% of the share capital.

2005

OmniTicket Group, leading international company in access control and ticket distribution for the leisure, entertainment and culture markets, is fully acquired.

2009

Best Union acquires Teleart, a company specialized in visitor experience and art exhibitions. It also acquires Charta, event management leading company.

2011

Best Union acquires IREC, a company specialized in ticketing technologies and access control for the cultural and entertainment industries.

2014

Best Union acquires Bookingshow Ticketing, a company operating in the field of online ticketing and retail distribution.

2017

Investcorp and the Vivaticket top management bought 100% of the shares of Vivaticket with the aim to become one of the largest ticketing company in the world.

2019

Vivaticket acquires Impronta Soluciones SL, a Spanish ticketing supplier with a scalable ticketing solution for any kind of distribution channel and a powerful payment solution for any sector.

2023

2000

Jumpy, a Fininvest Group company, acquires 20% of Best Union through a capital increase operation.

2008

Best Union is the only company in its sector to list on the Italian Stock Exchange. During the same year acquires Team2015, company active in the management of reception services for exhibitors and visitors.

2010

Best Union acquires Ticketweb.it, active in the promotion, sales and booking of tickets. In the same year acquires Amit, a company operating in the ticketing and management of automated box offices.

2013

Best Union acquires Enta Ticketing Solution, a London-based company operating in the ticketing sector, with an important customer base in the theatre industry.

2016

Best Union acquires Enta Australasia, leading company in ticketing and CRM solutions. It also acquires the ticketing business unit of Zucchetti Regulus.

2018

In June 2018, Best Union Company S.p.A. is delisted from the Italian Stock Exchange and takes on a new challenge, launching an important rebranding operation involving all the group's companies: Best Union becomes Vivaticket.

2021

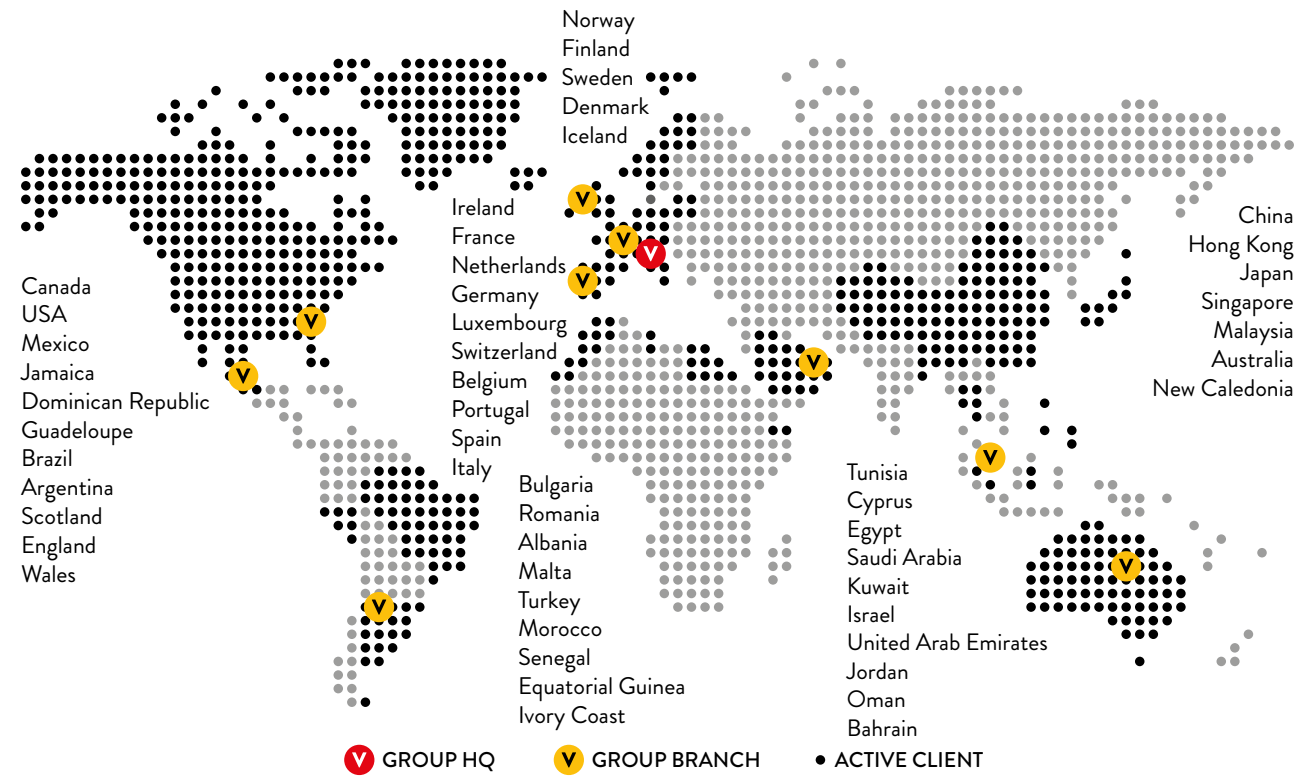

Venues reopen and live events restart. However, Vivaticket has never stopped: important investments in resources and technology have made the offer more and more in line with the new clients' needs.

TICKETING ACCESS CONTROL VENUE MANAGEMENT

TICKETING SYSTEM

Vivaticket designs and produces all its systems entirely in-house, leveraging years of experience in the leisure, culture, sports and entertainment sectors. This experience, combined with an ongoing commitment to innovation and a desire to accept market challenges, has made its products a global benchmark for integrated ticketing and access control solutions. Vivaticket offers powerful and versatile products that can

perfectly adapt to the needs of the largest theme parks or trade centers, as well as meet the requirements of smaller venues or even individual attractions. The system can be installed on both local and cloud servers, and offers a complete offline mode, ensuring continuity on both the sales and access control sides in case of connectivity issues. Vivaticket offers client/server solutions or SaaS solutions, according to the client needs.

WEB SOLUTIONS

Vivaticket builds in-house B2C and B2B websites that are fully integrated with the base system, in real time. A proprietary CMS can be used to manage content and translations.

All web pages are fully customizable with the customer's look&feel and in terms of graphics and functionality, to ensure a smoother user experience.

All the websites are responsive, multi-language and multi-currency; it is possible to manage online any kind of subscription, season pass, open ticket or voucher, and also integrate the sale of merchandising, food and beverage and any kind of additional service.

General admission, limited capacity, assigned seats and memberships can be sold, taking advantage of all the options present in the base system, including rolling discounts, vouchers, packages, money cards and suggestive upsells.

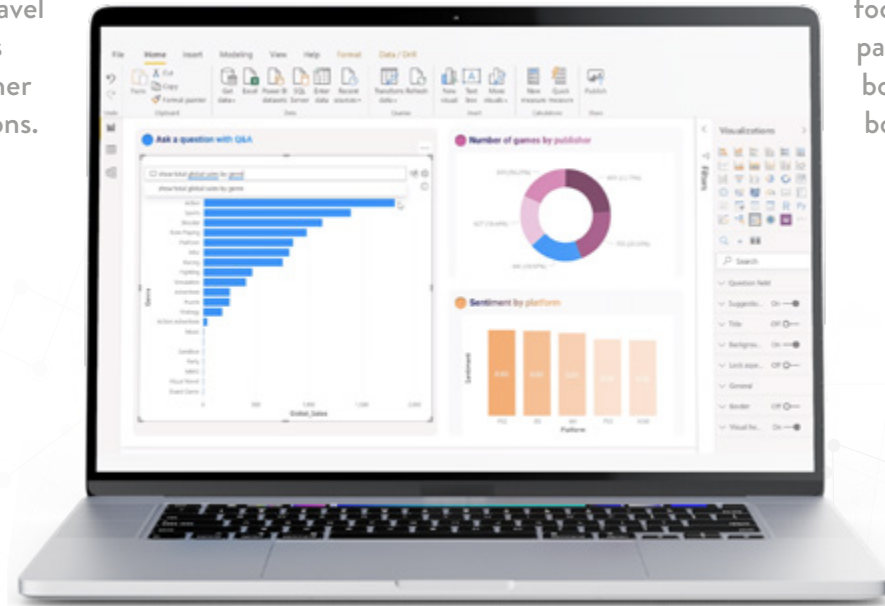

In addition, the B2B interface will allow you to manage business accounts, distributors, travel agents, partners; it will be possible to enable specific price lists, promotions, payment methods for each user and also to customize reports, directly accessible via the web, manage credit and related settlements, define incentive programs.

TICKETING SYSTEM

INTEGRATIONS

All Vivaticket systems are strongly “web service oriented”, optimized by design for integration with third party systems through one of the richest API libraries on the market.

The system is designed to allow for simplified integration with external business systems, offering the opportunity to expand sales networks through the interconnection of banks, supermarkets, travel agencies, tour operators and OTAs, as well as other external retail applications.

You can also integrate your own ecosystem of business management systems, from CRM to ERP, from BI software to IVR, from single sign-on systems to loyalty cards, from cash management systems to chat bots.

Finally, third parties can be integrated to guarantee a better user experience for your final customer: photo counters, lockers, dryers, stroller, towels, wheelchair, food & retail systems, parking systems, hotel booking systems, bookshops.

ACCESS CONTROL

All systems are built to be integrated with the most common access control devices on the market:

- Full height or standard turnstiles
- Speed gates
- Handheld scanners
- Laser or image readers
- Android devices through the proprietary App Gatekeeper®

All types of media technology can be utilized: linear barcodes, QRcodes, magnetic stripes, contact or proximity RFID chips, UHF devices, NFC devices, biometric readers (fingerprint recognition, facial recognition).

The application offers a wide range of features:

- Entries and re-entries
- Multi-venue and multi-zone clearance
- Point cards
- Check in / Check out
- Time-slots
- Anti-Pass back
- Photo or biometric recognition
- Light signals according to ticket type
- Group tickets
- Family tickets
- Dynamic access control validity
- Access control point of sale

VENUE

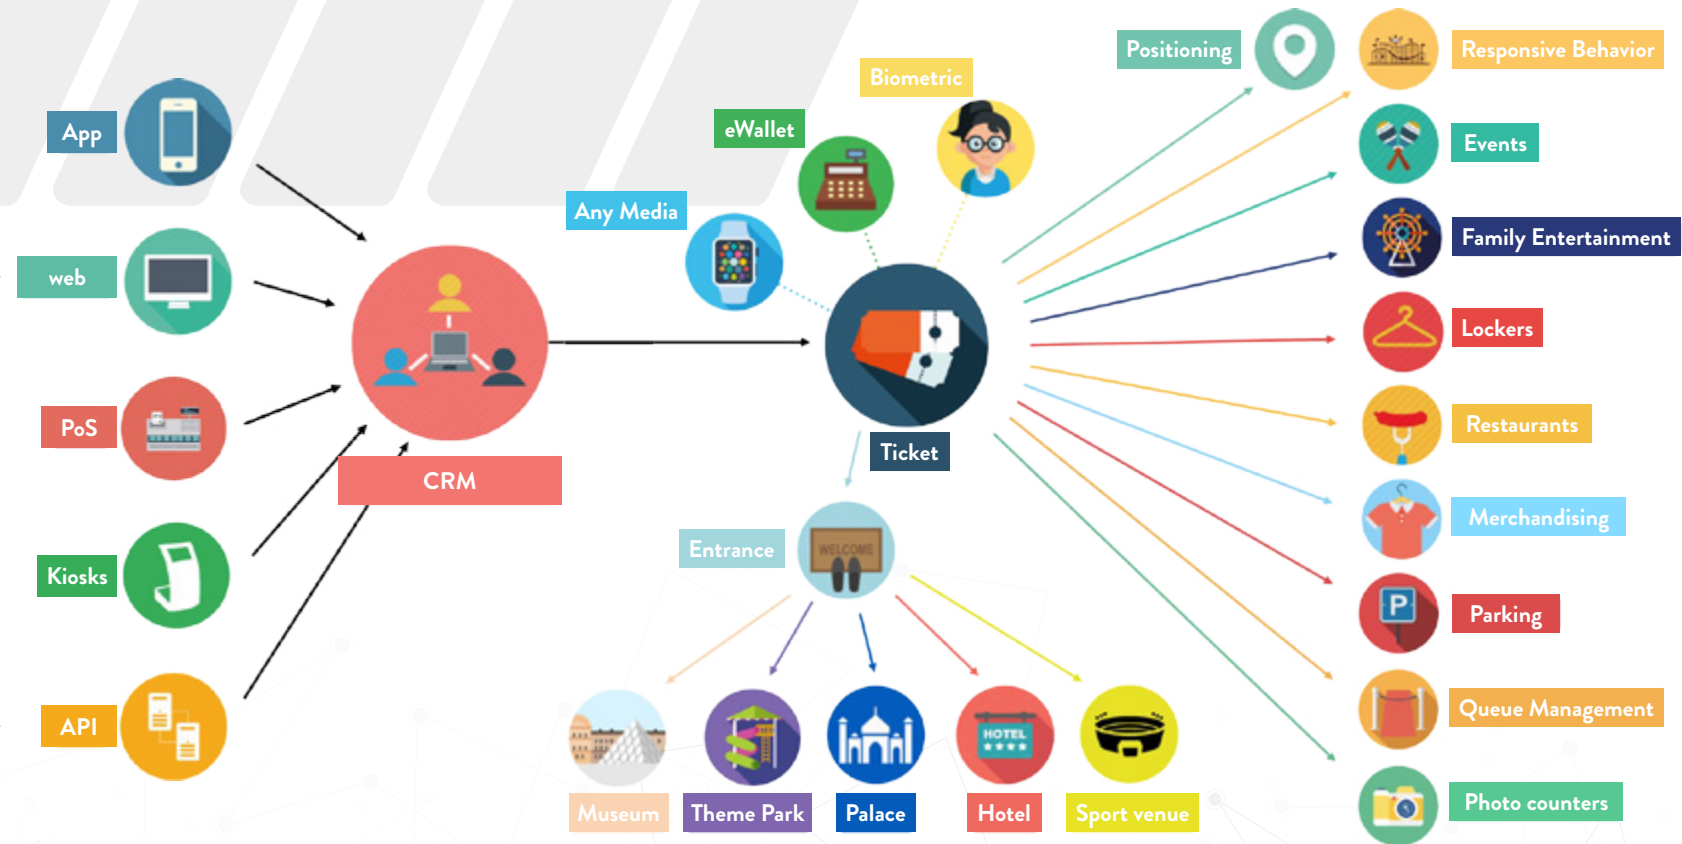

From the creation of the first RFID wristband for cashless payments in 2012, to the first NFC ticket in 2015, improving the user experience has always been the focus of Vivaticket's technological evolution. This effort has led to the evolution of our ticketing systems into true venue management systems, capable of following the customer through his entire journey.

From the decision making and registration phase, including via distributors or OTAs, to conversion, and then managing the entire user experience: parking, access control, retail, restaurants, additional services, family entertainment, events.

All this using the ticket as the only medium to access the multiplicity of offers, in the form preferred by the customer: paper ticket, e-wallet, wristband, hotel key, or, why not, even a simple glance in the camera.

MANAGEMENT

CONTACTLESS

Deliver an amazing frictionless experience by leveraging facial recognition technology: multi-area access control, facial payments, dynamic promotions, accreditation, GDPR compliance, custom interfaces.

Vivaticket's Frictionless Engine® is the most advanced ticketing technology on the market to date and represents a huge step forward for the experience industry worldwide.

The contactless experience consists of 4 simple steps:

1. register your face on the app, at the POS or directly at the gate
2. associate your tickets to your theme parks, events, museums, venues
3. associate your credit card to the electronic wallet
4. enjoy the full experience, just by showing your face!

EXPERIENCE

Vivaticket's contactless experience is not limited to gate access, but also includes retail, food and beverage and all other venue services. Additionally, the venue is not the limit: the customer can leverage the same account in different venues, not necessarily hosted in the same infrastructure, not necessarily belonging to the same tenant.

The main features of Vivaticket's Frictionless Engine® are:

- multi-tenant
- multi-site
- multi-area access control
- face payments
- dedicated promotions
- accreditation
- full GDPR compliance
- customized interface (venue by venue)
